CONTENTS

Volume 4, Issue Nos 1–6

COMMUNICATIONS IN APPLIED NUMERICAL METHODS

Issue No. 1, January–February 1988

Thickness Effect on the Spectral Properties of Thick Plates: K. Hassan 1

A Geometrically Nonlinear Finite Element Analysis of Wrinkled Membrane Surfaces by a No-compression Material Model: P. Contri and B. A. Schrefler 5

Numerical Method for the Resolution of Nonlinear Heat Transfer Problems: A. Jordan, F. Bouayed, A. Borucki and M. Benmouna 17

Contact Mechanical Algorithms: J. J. Kalker 25

An Efficient Method for Determining Eigenvalues in Vibratory Systems: Z. Zimoch 33

Multiderivative Methods for Nonlinear Beam Problems: E. H. Twizell and S. I. A. Tirmizi . 43

On the Bergan–Wang Approach for Moderately Thick Plates: H. Abdalla and K. Hassan ... 51

Geometric Sensitivity Analysis with Local Co-ordinate Transformations: R. A. Brockman . 59

A Refined Hermitian Isoparametric Plate Bending Element: S. Virtanen and A. Pramila 67

A Study of the Influence of the Angle Condition on Plate Bending of Triangular Finite Elements: K. Hassan and N. Sarigul 79

Computation of the Velocity Field of an Excited Shear Layer: M. Nallasamy 85

Extensional Universal Serendipity Elements: L. Zhang 91

Temporal and Spatial Adaptive Algorithm for Reacting Flows: M. M. Pervaiz and J. R. Baron 97

The Stokes Sieve Problem: C. Conca 113

Some Useful Data Structures for the Generation of Unstructured Grids: R. Löhner 123

Performance of Four Numerical Schemes for the Unconfined Flow (Nonlinear Boussinesq) Problem: A. Taigbenu 137

LETTER TO THE EDITOR 145

BOOK REVIEW 147

CONFERENCE DIARY 149

ANNOUNCEMENT 150

Issue No. 2, March–April 1988

On the Use of Deflation to Improve the Convergence of Conjugate Gradient Iteration: L. Mansfield 151

On Nonlinear Temperature-dependence of Thermal Strain: G. P. Mulligan 157

A General Formulation for Incomplete Blockwise Factorizations: V. L. Eijkhout 161

Direct Simulation of Gas Flows at the Molecular Level: G. A. Bird 165

Singularities at Angular Points in Elastic Contact Problems: V. I. Fabrikant and T. S. Sankar 173

A Method of Design of Internal Flow Channels with Viscous Flow Theory: F. Ntone and T.-T. Yang 179

Convergence of Transverse Shear Stresses in the Finite Element Analysis of Plates: T. J. R. Hughes and L. P. Franca 185

Mesh-refined Computation of Disordered Vortex Flow around a Cranked Delta Wing: Transonic Speed: A. Rizzi and C. J. Purcell 189

Adaptive Techniques in the Finite Element Method: J. Z. Zhu and O. C. Zienkiewicz 197

Stability Properties of some Algorithms for the Solution of Nonlinear Dynamic Vibration Equations: W. L. Wood and M. E. Oduor 205

Graphical Representation of Two-dimensional Fluid Flow by Stream Vectors: F. H. Bertrand and P. A. Tanguy 213

Symbolic Analysis of the Reduced Incompressible Navier–Stokes Equations: C. A. J. Fletcher and S. W. Armfield 219

Integrals over Boundaries at Infinity for the Boundary Integral Method May be Ignored: A. I. Sofianos 227

From Kirchhoff to Mindlin Plate Elements: J. Aalto 231

A Simplified Method for the Dynamic Analysis of Shell Structures: G. Lin, K. M. Sun and M. L. Lou 243

A Finite Element–Finite Difference Solution of Three-dimensional Viscous–Inviscid Interaction: Ü. Gülçat and A. R. Aslan 251

Solution of Full and Deficient Rank Linear Equations: R. P. Tewarson and J. F. Jen 255

Periodic Structure Beyond a Hopf Bifurcation: A. R. Mitchell, G. Stein and M. Maritz 263

Application of Spline Finite Strip Analysis to Variable Depth Bridges: C. E. Uko and A. R. Cusens 273

Bibliography on Finite Elements and Supercomputing: D. W. White and J. F. Abel 279

CONFERENCE DIARY 295

ANNOUNCEMENTS 295

Issue No. 3, May–June 1988

Advances in Computational Methods

PREFACE ii

Element-by-element Vector and Parallel Computations: G. F. Carey, E. Barragy, R. McLay and M. Sharma 299

On the use of Subcycling for Solving the Compressible Navier–Stokes Equations by Operator-splitting and Finite Element Methods: M. O. Bristeau, R. Glowinski, B. Mantel, J. Periaux and G. S. Singh 309

An Overview of Hypersonic Aerothermodynamics: G. T. Chapman 319

On a Modified Streamline Curvature Method for the Euler Equations: J. Q. Cordova and C. E. Pearson 327

Simulation Techniques for Multiphase and Multicomponent Flows: R. E. Ewing, M. S. Espedal, J. A. Puckett and R. J. Schmidt 335

Generalized Multigrid Approaches to Nonlinear Transient Thermal Problems: H. C. Huang and R. W. Lewis 343

A Parallel Algorithm for the General *LU* Factorization: D. R. Kincaid and T. C. Oppe 349

Effects of Geometric Nonlinearities on Explicit Time Integrators: M. O. Neal and T. Belytschko 361

The University of Minnesota Programme in Computational Science: P. C. Patton 369

On Some Recent Evolutions in Personal Supercomputing and Workstation Graphics: J. F. Hajjar, L. F. Martha, T. F. O'Connor and J. F. Abel 373

The Versatility of Automatic Mesh Generators Based on Tree Stuctures and Advanced Geometric Constructs: M. S. Shephard, P. L. Baehmann and K. R. Grice 379

Geometric Idealizations in Finite Element Computations: B. A. Szabó 393

A Finite Element Model for Tides and Currents with Field Applications: R. A. Walters 401

Time-splitting for Advection-dominated Parabolic Problems on One Space Variable: M. F. Wheeler, W. A. Kinton and C. N. Dawson 413

Linear and Nonlinear Finite Element Analysis on Multiprocessor Computer Systems: E. L. Wilson and C. H. Farhat 425

Iterative Algorithms and Software for Solving Large Sparse Linear Systems: D. M. Young and T.-Z. Mai 435

Issue No. 4, July–August 1988

Use of Quasi-Newton Methods for Large Strain Elastic–Plastic Finite Element Computations: J. C. Gelin and P. Picart 457

On the Folding of Numerically Generated Grids: Use of a Reference Grid: J. E. Castillo, S. Steinberg and P. J. Roache 471

On the Development of an Algorithm for Solving Stiff Nonlinear Dynamic Equations Based on the Broyden's Updating Method: J. Yuh and W. E. Holley 483

On the Competition between Artificial Methods and Boundary Integral Methods for the Stokes Equations in Exterior Domains: G. H. Guirguis 491

Adaptive and Hierarchical Weighted Residual and Least-squares Time Integration of Convection–Diffusion Problems: N.-E. Wiberg 499

Free Surface Flow—Exposing the Hidden Nonlinearity: J. A. Liggett 509

Upwind and Downwind Effects of Numerical Approximations to Wave Equations: C. E. Pearson 517

A Restarted Version of a Generalized Preconditioned Conjugate Gradient Method: O. Axelsson 521

Some Conjugate Gradient Methods for Symmetric and Nonsymmetric Systems: K. V. G. Prakhya 531

New Methods of Determining the Strange Attractor by Generalized Cell Mapping Approach: Z. W. Hua and W. Q. Tai 541

Guyan Reduction: S.-H. Chen and H. H. Pan 549

Boundary Element Study of an Anisotropic Plate: Z. Heng 557

Symmetrization of Coupled Eigenproblems by Eigenvector Augmentation: C. A. Felippa . 561

Solution of Electrostatic Problems by the *p*-Version of the Finite Element Method: B. A. Szabó 565

A Program for the Explicit Integration of a 4-Noded Planar Isoparametric Hybrid Stress Element: M. Ledvinka 573

Transformation of Incremental Plasticity Relation from Defining Space to General Cartesian Stress Space: A. H. C. Chan, O. C. Zienkiewicz and M. Pastor 577

The Convex Hull Problem for the Selection of Load Cases in Reinforced Concrete Cross-section Analysis: A. Recuero and F. Moran 581

A Boundary Value Method for a Class of Nonlinear Singular Perturbation Problems: M. K. Kadalbajoo and Y. N. Reddy 587

BOOK REVIEWS 595

ANNOUNCEMENTS 599

CONFERENCE DIARY 603

Issue No. 5, September–October 1988

Numerical Methods in Thermal Problems

PREFACE ii

Heat Transfer Analysis of Structures Containing Phase-change Material: D. Loyd and M. Fröier 607

Boundary Elements for Non-linear Heat Conduction Problems: L. C. Wrobel and C. A. Brebbia 617

Boundary Integral Analysis with Orthogonal Basis Functions: B. Dorri and V. Kadambi 623

Natural Convection in an Enclosure with a Vertical Baffle: E. Zimmerman and S. Acharya 631

An Isoparametric Boundary Solution for Thermal Radiation: M. A. Keavey 639

Thermal Analysis of a Graphite First Wall for RFX Fusion Experiment: P. Brunello, F. Gnesotto, C. Majorana and B. A. Schrefler 647

Numerical Modelling of the Heat Transfer In and Around a Steel Bar During Hot Rolling: J. A. Visser and E. H. Mathews 657

Natural Convective Heat Transfer Over Inclined Short Plates: K.-S. Chang and I.-C. Han ... 665

An Analysis of Thermal Effects of Coupled Thermo-plasticity in Metal Forming Processes: A. Sluzalec 675

Comparative Study for a New Solution to the Inverse Heat Conduction Problem : E. Weiland and J. P. Babary 687

Tracking the Transient Phase-change Front Using the Temperature of the Convectively Cooled Surface: H.-O. Choi 691

ANNOUNCEMENTS 697

Issue No. 6, November–December 1988

A Simple Program for Plotting Streamlines and Calculating Residence Times: Y.-J. Jan 699

Laplacian Smoothing and Delaunay Triangulations: D. A. Field 709

A Simple Procedure for Reducing Numerical Integration Errors Near Singularities: V. P. Manno 713

FEM–FCT: Combining Unstructured Grids with High Resolution: R. Löhner, K. Morgan, M. Vahdati, J. P. Boris and D. L. Book 717

An Integration Algorithm and the Corresponding Consistent Tangent Operator for Fully Coupled Elastoplastic and Damage Equations: A. Benallal, R. Billardon and I. Doghri ... 731

A Comparison of Solutions for Adiabatic Shear Banding by Forward-difference and Crank–Nicolson Methods: R. C. Batra and T. W. Wright 741

General Form of the Generalized Variational Principle in Elasticity: L. Shikui and J. Zhongxiang 749

Analysis of Unbounded Field Problems Using Dampers: S. K. Sharan 761

Numerical Calculation of Profiles Corresponding to Given Pressure Distributions: J. P. Meyer, E. H. Mathews and G. P. Van Zyl 767

A Compact Database Scheme for the Partitioned Frontal Solution Algorithm: H.-T. Lin 773

A New Generalized Conforming Triangular Element for Thin Plates: L. Yuqiu and Z. Junqing 781

A Numerical Comparison of Conjugate Gradient-like Methods: H. P. Langtangen and A. Tveito 793

On the Numerical Instability of the Smeared-crack Approach in the Non-linear Modelling of Concrete Structures: F. González-Vidosa, M. D. Kotsovos and M. N. Pavlović 799

A Shape Function Codewriter: M. A. Aladjem and M. D. Mikhailov 807

Exact Formulae for Areas, Volumes and Moments of Polygons and Polyhedra: J. A. Liggett 815

A Point Concerning Quadratic Elements in Two-dimensional Boundary Element Methods: A. Deb and H.-C. Wang 821

Steady Three-dimensional Thermal Convection in a Vertical Rectangular Enclosure: A. Chikhaoui, M. K. Maslanik and R. L. Sani 825

On the Imposition of a Flowrate by an Augmented Lagrangian Method: A. Fortin 835
